# Please note that the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing. To ensure adequate road holding, the load on the front axle, under all conditions, must not be less than 40% or more than 70% of the total weight. Care must be taken when distributing loads. Please see the Technical Handbook for permissible axle loads, the loadings and weights stated are maximums and must not be exceeded under any circumstances

### DEALER FIT

For details of dealer fit options please go to page 19.

#### Notes:

- # Please note that the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing. To ensure adequate road holding, the load on the front axle, under all conditions, must not be less than 40% or more than 70% of the total weight. Care must be taken when distributing loads. Please see the Technical Handbook for permissible axle loads, the loadings and weights stated are maximums and must not be exceeded under any circumstances

#### † Optional 5th belt and drop down bed spec

An additional belted travelling seat and drop down bed can be added to the 674, 684 & 694:

Berths (sleeping positions)	+2
Reduced payload due to addition of seat and bed	- 100kg
All other specification as table	

**Note:** The mass of the additional passenger must be taken into consideration when loading the vehicle

### DEALER FIT

For details of dealer fit options please go to page 19.

#### Notes:

\* 48kg on 574 & 584 Lounge

\*\* For optional roof ladder add 125mm to length

# Please note that the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing. To ensure adequate road holding, the load on the front axle, under all conditions, must not be less than 40% or more than 70% of the total weight. Care must be taken when distributing loads. Please see the Technical Handbook for permissible axle loads, the loadings and weights stated are maximums and must not be exceeded under any circumstances

‡ The maximum trailer weight is limited by the gross train weight which must not be exceeded. For example if a vehicle with a gross train weight of 6000kg is loaded to the maximum MTPM of 4250kg, then the maximum trailer weight possible is 1750kg. Reducing the weight of the vehicle by removing payload, will allow you to increase the trailer weight up to a maximum of 2000kg.

### Notes:

Est. Estimate

# Please note that the additional weight of the tow bar and trailer nose weight increases the rear axle loading of the motorhome so care should be taken that the rear axle load is not exceeded when towing. To ensure adequate road holding, the load on the front axle, under all conditions, must not be less than 40% or more than 70% of the total weight. Care must be taken when distributing loads. Please see the Technical Handbook for permissible axle loads, the loadings and weights stated are maximums and must not be exceeded under any circumstances.

‡ The maximum trailer weight is limited by the gross train weight which must not be exceeded. For example, if the vehicle is at the maximum MTPLM of 4800kg, then the maximum trailer weight possible is 1200kg. Reducing the weight of the vehicle by removing payload, will allow you to increase the trailer weight up to a maximum of 1600kg

\* The maximum trailer nose weight is limited to 40kg

## PRICE NOTES

On the road (OTR) price includes a recommended cost of £1,495.00 to cover delivery to dealer in Great Britain, a set of number plates (inc. VAT), 12 months road fund licence and first registration fee. See model for price details.

Recommended retail prices for 2021 models effective from 1st May 2021.  
This price list supersedes all previous price lists.

## GENERAL TECHNICAL NOTES

- The Maximum User Payload includes:
  - the conventional load (this is the allowance for passengers)
  - essential habitation equipment (items and fluids required for safe and proper functioning of habitation equipment)
  - optional equipment (items available from the manufacturer over and above the standard specification)
  - personal effects (those items not covered by the above)
- The Mass in Running Order is the mass of the unladen vehicle including a 75kg allowance for the driver plus engine coolants and 90% of the fuel tank capacity and 1 x 6kg Calor Lite LPG cylinder. The MRO is calculated with the fresh water tank empty. If you travel with water in the fresh water tank then the payload will reduce accordingly.
- Please take care to ensure that you have allowed for the masses of all items you intend to carry in the motorhome, e.g. passengers, optional equipment, essential habitation equipment and personal effects, such as clothing, food, pets, bicycles, sailboards, sports equipment etc.
- Warning - under no circumstances should the maximum technical permissible laden mass of this motorhome be exceeded.
